HRC Economic Agenda:

Now comes Hillary Clinton, and her economic agenda could be summarized easily: Whatever Obama is doing, let's double down on it.

Take ObamaCare. It's one of the biggest speedbumps in our economy. The mandates and taxes in the law are keeping many businesses from hiring new workers. The law is holding down worker hours and reducing the payoff from working.

And now we are hearing that health insurance rates for some Americans could rise by more than 50 percent. This weekend Hillary Clinton reiterated that when it comes to ObamaCare, there's no reason to change course. I disagree, and there are millions of people who provide living proof that Hillary Clinton's agenda won't work – because they're not working at full-time jobs.

## Working Longer Hours

**Gov. Jeb Bush**, 7/9/15

# Hillary Clinton is Wrong: Americans Want the Opportunity to Work

In America today, more than 6.5 million people are stuck in part-time jobs. That is 6.5 million people who want a full-time job, but can't find one in the anemic Obama economy. They are earning \$30,000 less than those who are fully employed and they are falling behind.

In New Hampshire this week, I talked about these struggling Americans who deserve the opportunity to work, who understand the value of work and who want to achieve earned success for their families.

The truth is the Obama administration has created rules that have made it harder for people to see rising incomes and harder for businesses to create new jobs and hire more workers.

Hillary Clinton made it clear she disagrees with me. She thinks the economy is doing just fine. She thinks American workers are doing just fine. I'm not surprised. Hillary Clinton's economic agenda can be summarized easily: Whatever Obama is doing, let's double down on it.

Here is what I believe: We need to grow the economy and create more opportunities for Americans to get ahead. I refuse to accept that our economy has to sputter along at a tepid pace of 2-percent growth. The defeatist left may think this is the new normal. I believe this nation has the potential to grow much faster, provide far more opportunities, and see household incomes rise. I believe we can grow at 4 percent again and create 19 million new jobs for American workers. And I know that with your support, I can help America become a nation where everyone can prosper, everyone can participate and everyone has the right to rise.

Stunning...and yet completely unsurprising. Hillary Clinton managed not to answer any substantive questions during that interview. And she wasn't even asked about her track record as Secretary of State. If we want to win back the White House in 2016, we need a Republican nominee who won't be afraid to hold Hillary accountable--who will ask her about Benghazi, who will ask her about her conflicts of interest while her family accepted money from countries with business before her, who will ask her why she thought a gimmicky red reset button would dissuade the ambitions of someone like Vladmir Putin.

Another View -- Lindsey Graham: Want to defeat ISIL? Here's how I would do it

**By LINDSEY GRAHAM**

**THE OBAMA-CLINTON** Doctrine of “strategic patience” is a failure. It has led to allies who doubt our resolve and enemies who challenge us at home and abroad. Terrorist groups, like ISIL, are rich and growing while President Obama runs out the clock on his time in office.

He states ISIS must now be turned back and Syria’s Bashar al Assad must go. But he has no strategy for achieving these goals. His recent announcement of 450 additional troops amounts to nothing more than duct tape, a desperate attempt to hold together a crumbling Middle East just long enough for his successor to step in.

I am running to be the next President. I am ready to change course on day one and demonstrate to friends and foes alike we have the capability, capacity and will to secure our nation. Today, the American military footprint in Iraq is insufficient in numbers and capabilities to regenerate an effective Iraqi fighting force. One of the architects of the 2007 Surge has said 10,000 American forces will be necessary to change the tide of battle. I agree. The current force that President Obama has dispatched is inadequate and will not lead to ISIL’s demise.

I would send additional forces as part of a new, comprehensive strategy for victory. These forces would allow us to put trainers and advisers with the Iraqis at the battalion level to strengthen their resolve. I would use air controllers and attack helicopters to create and continually apply pressure on ISIL’s leadership. I would also change the approach in Syria. The current plan to train 5,000 Free Syrian Army soldiers puts us woefully behind ISIL’s ability to recruit foreign fighters.

And President Obama’s hope of defeating Assad appears purely aspirational. Our Arab allies no longer accept another Iranian puppet wreaking havoc on the region. As long as Assad remains, he will be a magnet for radical Sunnis looking for a fight. The flow of Syrian refugees will continue to stream into neighboring nations, pushing our partners to the brink of a crisis they cannot contain. In particular, we cannot allow our friend, the King of Jordan, to be undermined by the bloodletting. He remains one of the best and strongest voices for moderation in the region.

The situation in the Middle East will never be fixed while Assad remains. I would drive him from power by bringing together a regional effort with the support of forces from

Turkey, Egypt, Saudi Arabia and others. No Arab Army will commit to fighting ISIL while leaving Assad in power, and America should not take on this fight without regional support.

As President, I would also provide enough American capability within this regional force to ensure success. The specialties we possess are lacking in regional forces, but are essential to the destruction of ISIL and pushing Assad out of power. The American ground component in Syria would be similar to that of Iraq, including Special Forces units, logistical support and an embedded U.S. presence at the Brigade level.

We must understand that Iraq and Syria constitute a single battle space in the fight against ISIL and our approach must be comprehensive. We must also understand a complementary diplomatic effort is essential. To hold Syria, the Alawites, Sunnis and other factions must reach political consensus. In Iraq, a diplomatic surge in Baghdad is as imperative as any additional ground forces. However, no solution is achievable unless we first have security. That is the lesson our nation and I learned from the 2007 Surge.

I would also heed the lessons of Obama's disastrous 2011 withdrawal from Iraq and refuse to hastily withdraw all our forces from the region. An American presence is critical to ensuring these areas do not fall into chaos once again. Finally, I would be honest with the American people about what kind of commitment this would entail, even when the truth is hard to hear.

**Under the failed leadership of President Obama and former Secretary Clinton, Syria and Iraq have become the perfect base from which to launch attacks directly against our nation by seasoned fighters holding Western passports.** It is a base from which they already project a barbaric form of power that inspires other radicals and lone wolves, from Paris to Garland, Texas, while committing their heinous acts, including attempts at the systematic destruction of the Christian religion in the Middle East.

Neither the denial of isolationists nor rudderless half measures will secure our nation. Only a bold strategy, backed by the firm resolve of a determined President will rid the world of both ISIS and Assad, stabilize the region, and prevent the forces of radical Islam from bringing their fight to our homeland once again.

**Our current Commander in Chief has neither the strategy nor the resolve. Hillary Clinton proved she lacks them too. I am ready on day one with both.**

CRUZ: IT'S TIME TO TELL THE AMERICAN PEOPLE THE TRUTH ABOUT PRESIDENT OBAMA'S SHAM DEAL WITH IRAN

07/06/15

*Cruz Calls upon Hillary Clinton, Other Presidential Candidates to Publicly Acknowledge Negotiations with Iran Will Not Make Us Safer and Demand that Sec. Kerry Leave Vienna Immediately*

**HOUSTON, Texas** - U.S. Sen. Ted Cruz, R-Texas, released the following statement regarding the disastrous nuclear deal the Obama Administration is trying to make with Iran:

"It is time to acknowledge that the Iran talks have been a disaster. Today I am calling upon former Secretary of State Hillary Clinton, under whose leadership this bad deal began, and other Presidential candidates to join me in demanding that Secretary Kerry stop negotiating with this hostile and violent enemy of America and immediately leave Vienna.

"We are now on the eve of what is by my count the fifth 'deadline' for a comprehensive nuclear deal with the Islamic Republic of Iran. It is still unclear if this arbitrary date will be more respected than any of its predecessors, but it hardly matters at this point. By any metric, the negotiations have failed—at least from the perspective of America's national security. All of our key priorities—stopping enrichment of uranium, removing stockpiles of enriched uranium, and exposing and eradicating the potential military applications of Iran's nuclear program—have been ceded to the Iranians.

"Perhaps there was some hope for this process two years ago when Hasan Rouhani became president of Iran. Given Iran's dire economic circumstances caused by the unprecedented program of international sanctions, we could have demanded concessions from the mullahs before any negotiations took place—notably the release of all Americans unjustly held in Iran and the recognition of Israel's right to exist as a Jewish state. Once negotiations began, we could have made it clear the above conditions would have to be met before sanctions relief. And rather than stove-piping Iran's nuclear program from its abysmal human rights record, aggressive state sponsorship of terrorism and ballistic missile program—the only purpose of which is to deliver a nuclear weapon—we should have insisted these issues be addressed to our satisfaction as well.

"Unfortunately, in their unseemly eagerness to make a deal, President Obama and Secretary Kerry have squandered all our advantages and ceded all our priorities. There is no possibility for an acceptable agreement at this point because there is no incentive for the Iranians to make one. Our first priority must be to end this farce; the best we can do is cut our losses."

Bobby Jindal: Sanders and Clinton Would Both Turn Us Into Greece

- [Gov. Bobby Jindal](#) 1:08 PM ET

You can't make it impossible for business to thrive and expect the economy to grow  
Greece created democracy, and now the Greeks are showing us how to  
kill it.

It's simple math to understand what is happening in Greece right now. When Greece joined the euro, it benefited from the financial support of its more fiscally responsible neighbors in the euro zone. Rather than taking the opportunity to enact the structural reforms that could have increased growth — reforms that it still has not undertaken — Greece instead went on a spending spree funded by other people's money.

Greece has been cooking the books with complicated financial instruments for years. But the problems don't stop there. Greece's Rubik's Cube tax code and rampant corruption make tax evasion widespread. Golden parachute public pensions that allow public sector workers to [retire as early as 45](#) drain dollars out of the government coffers while incentivizing a still healthy and work-age workforce to live on the public dime. It's hard to have sufficient tax paying workers when about [75% of Greek public-sector employees](#) retire by the age 61.

After taking office in January, the Alexis Tsipras administration reversed promised privatization of state-owned assets like the Port of Piraeus. In 2011, the IMF predicted Greece could bring in [50 billion euros](#) (\$56 billion) from the sale of state assets, not to mention the savings from moving those employees off the public wage and benefit system. To date, it has raised about 3 billion euros.

Business has no interest in creating jobs when crushed by government regulation. Tsipras promised to raise the minimum wage, despite the economy spiraling out of control. It's not surprising the March unemployment rate stood at [25.6%](#).

This is the European nightmare. [The way of Greece is where Hillary Clinton and Bernie Sanders will take us](#). It's simple math: You can't

spend more than you take in. You can't make it impossible for business to thrive and expect the economy to grow. No wonder the U.S. has had a disappointing about 2% "recovery" growth. That's not an accident—it's the result of failed policies.

Clinton and Sanders are math deniers, like most of the Democrats in D.C. They want to grow the government economy instead of the real American economy. Rather than pursuing tax reform to improve growth or entitlement changes to reduce future expenditures, Clinton and Sanders are focused on spending trillions on Obamacare, giving free college to everyone, and raising the federal minimum wage.

This was all on plain view in New Hampshire this past weekend, where Clinton spent the weekend promoting a third term of President Barack Obama's failed policies. The irony is that her dishonesty and lack of transparency is a windfall for Sanders.

Sanders is rising in the polls. Why? Because he's honest. He freely admits that he believes in socialism, and Democrats are flocking to the only honest candidate running on their side. Sanders should write Clinton a thank you note.

Sanders may be saying what Clinton will not say, but the reality is they're both socialists. And if you want a peek into our future with Clinton or Sanders, then look at what's happening in Greece today. Sanders proudly said on Sunday that he wants to raise taxes.

Sanders and Clinton seem to believe prosperity lies in the hands of government. We know it lies in the hands of our people.

We have to stop pretending. Greece pretended that debt didn't matter for years. It pretended it could spend money it didn't have. It pretended that there was some mythical pot of money in Athens that didn't exist. It pretended that 1+1 didn't equal 2.

The politicians in Puerto Rico are no different. They are demanding that we change U.S. laws so that they can file for bankruptcy. They are even threatening to sway the presidential election in order to force candidates to agree with them. These are the same politicians that led the country to bankruptcy. Everyone knows exactly what is going on here — they are asking the U.S. taxpayers to pay for a bailout. That's where this leads, and we should be honest about it. I oppose this.

Unfortunately, we better admit that our politicians in Washington are taking us down the exact same road that Puerto Rico is on, and that Greece has gone down. The federal minimum wage has strangled economic growth in Puerto Rico. The Puerto Rican government tried to throw money at the problem with incentive programs to lure business — but that just cost money and didn't fix the structural problem, so the economy continued to stall.

I know because in Louisiana we reversed decades of outmigration, and we created more than 90,000 jobs by reducing regulations and cutting taxes. Louisiana's economy boomed. We can do the same for America's economy. If you want more borrowing and spending, then vote for the Democrats. We know where that leads — Greece and Puerto Rico have shown us how quickly irresponsible spending can kill a democracy.

Hillary Clinton argues the economy is rigged in favor of wealthy interests – but what she won't tell you is that big government is doing the rigging. A massive regulatory apparatus inevitably becomes the instrument of those with the lawyers and lobbyists necessary to influence it.

Government should work to empower and protect the private sector, not to control it. Just two months ago, I proposed a bipartisan plan

<http://www.redstate.com/diary/govwalker/2015/07/04/july-4-honors-independence-big-government-dependence-2/>

The 4<sup>th</sup> of July marks an incredible day in history. Some 239 years ago, the Founding Fathers declared our independence from an overbearing and intrusive British government. Their extraordinary act of courage marked the birth of an exceptional nation, where citizens enjoy the greatest freedom in the world.

America is unique because our founders recognized that true freedom does not come from government, it comes from our Creator. Yet today this principle is under assault by the actions of a federal bureaucracy that is always expanding and encroaching more upon our daily lives. The political class in Washington, along with President Obama, Hillary Clinton, and their special-interest allies, embrace this bureaucratic mess and are fighting to make government the arbiter of individual success.

But the founders did not declare their independence from one big government only to create another. That's why the 4<sup>th</sup> of July - not April 15 - is a national holiday. Americans don't cheer our dependence on government, but rather our independence from it.

Freedom and prosperity aren't created by federal bureaucrats in Washington. These principles are God-given rights that empower us to live our own lives and control our own destinies. This belief is what makes America a beacon of hope around the globe.

America is a place where it doesn't matter who you are or where you come from. A place where as long as you work hard and play by the rules, you will have the freedom and opportunity to succeed and live your life as you please. But nearly six years into Obama's presidency, many feel this ideal is slipping away.

The principles upon which America was founded must be restored. The independence our founders declared some 239 years ago is too precious to be squandered. This July 4, we must renew our commitment to fight for our independence from big government every single day. After all, that's what the holiday is all about.

# Rubio dismisses Hillary Clinton's immigration comments as 'silly talk'

By [Sean Sullivan](#) July 8 at 3:19 PM

CEDAR RAPIDS, Iowa -- Sen. Marco Rubio (R-Fla.) on Wednesday dismissed Democratic presidential front-runner Hillary Rodham Clinton's recent assertion that Republican presidential candidates fall on a "spectrum" of antagonism toward illegal immigrants.

"It's silly talk," the GOP White House hopeful told reporters here after a campaign stop. "She's the one who didn't even want to give them driver's licenses six years ago when she ran for president."

Rubio reiterated that he supports immigration reform in a piecemeal manner that starts with addressing concerns about border security. But he once advocated a comprehensive approach as part of a bipartisan Senate coalition whose bill passed the upper chamber of Congress but then died in the House. "They range across a spectrum of being either grudgingly welcome or hostile toward immigrants," Clinton told CNN in an interview broadcast Tuesday, referring to GOP presidential contenders.

The Florida senator said he thinks voters are "capable of distinguishing the Republican Party from Donald Trump," who recently made controversial

remarks about Mexican immigrants. Rubio said he disagrees "strongly" with Trump's comments, which he called "offensive" and "divisive," echoing a statement he issued last week.

Asked whether Congress should allow the U.S. commonwealth of Puerto Rico to file for Chapter 9 municipal bankruptcy like cities in U.S. states can do, Rubio did not provide a yes or no answer. He said he expected to have more to say on the topic "over the next 48 to 72 hours."

"We've been engaged on this issue now for a couple months," said Rubio. "It's complex because we want to make sure whatever decision we make with regards to this is probably going to create a precedent for other jurisdictions in the country that are going to face similar situations in the near future."

Both Rubio's GOP rival [Jeb Bush](#) and Clinton have supported the bankruptcy approach.

"Unlike some of the other people opining on it, we're actually in a position to propose something that could pass. We want it to be the right thing," said Rubio.

TRUMP UNLOADS: Hillary Clinton was 'the worst' and is 'extremely bad'

Real estate mogul and Republican presidential candidate Donald Trump shot back after Democrat Hillary Clinton said she was "disappointed" with his comments about Mexican immigrants in a CNN interview.

In a statement sent to Business Insider on Wednesday, the day after Clinton's interview aired, Trump slammed his rival for her record and immigration policy.

"Hillary Clinton was the worst Secretary of State in the history of the United States. On top of that, **she is extremely bad on illegal immigration**," Trump said. "Despite anything you may hear to the contrary, I do not think she is electable."

In the interview, Clinton, who is currently leading the Democratic field, [criticized remarks Trump made in his campaign announcement](#) where he described some Mexican immigrants as criminals and rapists.

"I've very disappointed in those comments. And I feel very bad and very disappointed with him and with the Republican Party for not responding immediately and saying, 'Enough. Stop it,'" Clinton said.

**Immigration:**

Pressed about Republican **Jeb Bush**, who has called parents bringing children illegally into the U.S. an "act of love," Clinton maintained that the former Florida governor doesn't want to give people already in the country full-fledged legal status.

"He doesn't believe in a path to citizenship -- if he did at one time, he no longer does," she said. "As I said, they're on a spectrum of hostility which I think is really regrettable in a nation of immigrants like ours."

...

Bush's camp countered by pointing to "flip-flops" by Clinton on immigration.

"Hillary Clinton has once again changed her position on an issue for politically expedient purposes. After voting for the poison pill amendment that stopped immigration reform in its tracks as a Senator and saying she believed the unaccompanied minors 'should be sent back' to their home countries last year, she is now running further to the left on immigration policy than even **President Obama's** White House believes is legally feasible," Bush spokeswoman **Emily Benavides** said in a statement. ## 'Rope line' jokes aplenty as Fiorina knocks Clinton

...

Republican presidential hopeful Carly Fiorina casts herself as the anti-Hillary candidate. An audience in Portsmouth was happy to compare and contrast.

"Where's your rope line?" a man asked her Tuesday morning.

The grinning questioner was inspired by Democrat Hillary Clinton's use of a rope line to literally hold reporters back from covering her while she walked in the Fourth of July parade Saturday in Gorham. Others in the crowd at Geno's Chowder & Sandwich Shop in Portsmouth cracked the same joke.

Fiorina also teed up on it. "Ladies and gentlemen," she began her remarks, "I don't want to rope off the press."

...

"Hillary Clinton cannot be President of these United States because she's not trustworthy," Fiorina said in Portsmouth. "She's not transparent. Despite her many titles, she lacks a track record of leadership, and the policies she is pursuing are doubling down on every failed policy of the Obama administration from the last seven years."

Pataki, the former New York governor, also reportedly tweaked Democratic presidential contender Hillary Clinton on Monday, showing up to his press conference carrying a rope, a reference to Clinton staffers who kept reporters at bay with a rope line during a Fourth of July parade in Gorham on Saturday.

"It was absurd how Hillary kept people at a distance by a walking ropeline, but I really think in a sense it's emblematic of the way Washington feels too often towards the American people," Pataki said.

**Donald Trump**, Press Release, 7/6/15

<http://www.businessinsider.com/donald-trumps-epic-statement-on-mexico-2015-7>

On Immigration:

Statement from Donald J. Trump:

I don't see how there is any room for misunderstanding or misinterpretation of the statement I made on June 16th during my Presidential announcement speech. Here is what I said, and yet this statement is deliberately distorted by the media:

"When Mexico (meaning the Mexican Government) sends its people, they're not sending their best. They're not sending you (pointing to the audience). They're not sending you (pointing again). They're sending people that have lots of problems, and they're bringing those problems to us. They're bringing drugs. They're bringing crime. They're rapists. And some, I assume, are good people! But I speak to border guards and they tell us what we're getting. And it only makes common sense. They're sending us not the right people. It's coming from more than Mexico. It's coming from all over South and Latin America, and it's coming probably from the Middle East. But we don't know. Because we have no protection and we have no competence, we don't know what's happening. And it's got to stop and it's got to stop fast."

What can be simpler or more accurately stated? The Mexican Government is forcing their most unwanted people into the United States. They are, in many cases, criminals, drug dealers, rapists, etc. This was evident just this week when, as an example, a young woman in San Francisco was viciously killed by a 5 time deported Mexican with a long criminal record, who was forced back into the United States because they didn't want him in Mexico. This is merely one of thousands of similar incidents throughout the United States. In other words, the worst elements in Mexico are being pushed into the United States by the Mexican

government. The largest suppliers of heroin, cocaine and other illicit drugs are Mexican cartels that arrange to have Mexican immigrants trying to cross the borders and smuggle in the drugs. The Border Patrol knows this. Likewise, tremendous infectious disease is pouring across the border. The United States has become a dumping ground for Mexico and, in fact, for many other parts of the world. On the other hand, many fabulous people come in from Mexico and our country is better for it. But these people are here legally, and are severely hurt by those coming in illegally. I am proud to say that I know many hard

working Mexicans—many of them are working for and with me...and, just like our country, my organization is better for it.

The Mexican Government wants an open border as long as it's a ONE WAY open border into the United States. Not only are they killing us at the border, but they are killing us on trade ... and the country of Mexico is making billions of dollars in doing so.

I have great respect for Mexico and love their people and their peoples' great spirit. The problem is, however, that their leaders are far smarter, more cunning, and better negotiators than ours. To the citizens of the United States, who I will represent far better than anyone else as President, the Mexican government is not our friend...and why should they be when the relationship is totally one sided in their favor on both illegal immigration and trade. I have pointed this out during my speeches and it is something Mexico doesn't want me to say. In actuality, it was only after my significant rise in the polls that Univision, previously my friend, went ballistic. I believe that my examples of bad trade deals for the United States was of even more concern to the Mexican government than my talk of border security.

I have lost a lot during this Presidential run defending the people of the United States. I have always heard that it is very hard for a successful person to run for President. Macy's, NBC, Serta and NASCAR have all taken the weak and very sad position of being politically correct even though they are wrong in terms of what is good for our country. Univision, because 70% of their business comes from Mexico, in my opinion, is being dictated to by the Mexican Government. The last thing Mexico wants is Donald Trump as President in that I will make great trade deals for the United States and will have an impenetrable border--only legally approved people will come through easily.

Interestingly, Univision has just announced they are attempting to go public despite very poor and even negative earnings, which is not a good situation for a successful IPO or high stock price—not to mention that I am currently suing them for breach of contract. Remember, Univision is the one who began this charade in the first place, and they are owned by one of Hillary Clinton's biggest backers. After the speech was made, there were numerous compliments and indeed, many rave "reviews"—there was very little criticism. It wasn't until a week after my announcement that people started to totally distort these very easy to understand words. If there was something stated incorrectly, it would have been brought up immediately and with great enthusiasm.

The issues I have addressed, and continue to address, are vital steps to Make America Great Again! Additionally, I would be the best jobs President that God ever created. Let's get to work!

Rand Can Beat Hillary:

# RAND PAUL

THE DEMOCRATIC PARTY'S

#1 TARGET

Comment

Rand Paul

According to new research by The Hill newspaper, the Democratic National Committee has attacked me more than any other Republican presidential candidate. I'm the Democrats' #1 target because they know I would be the strongest Republican candidate against Hillary Clinton in the General Election and it's clear they will hold nothing back against me.

Will you help my campaign fend off the attacks from the Democratic Party and Hillary's Washington machine by chipping in just \$5 or \$10 right now? A strong show of support will let the Democrats know that we mean business. Electability:

"Everybody is consumed with the Republican primary in Iowa," Paul said to a crowd of about 150 at the Cedar Rapids Public Library. "I am thinking about the general election. Who can beat Hillary Clinton? Right now I am the only one ahead of Hillary Clinton in Iowa, New Hampshire, Colorado, West Virginia."

....

Paul said this strategy of going after a new constituency is “the way you win elections,” and notes he is leading Hillary Clinton among independent voters “across the board.”

HRC Economic Agenda:

Now comes Hillary Clinton, and her economic agenda could be summarized easily: Whatever Obama is doing, let's double down on it.

Take ObamaCare. It's one of the biggest speedbumps in our economy. The mandates and taxes in the law are keeping many businesses from hiring new workers. The law is holding down worker hours and reducing the payoff from working.

And now we are hearing that health insurance rates for some Americans could rise by more than 50 percent. This weekend Hillary Clinton reiterated that when it comes to ObamaCare, there's no reason to change course. I disagree, and there are millions of people who provide living proof that Hillary Clinton's agenda won't work – because they're not working at full-time jobs.
